PROFESSIONAL SUMMARY

Software Development Engineer (Fresher) with hands-on experience building scalable full-stack web applications using JavaScript, TypeScript, React, Next.js, and REST APIs. Foundation in Data Structures & Algorithms, object-oriented programming, and core computer science fundamentals, including Operating Systems and DBMS. Experienced in designing modular architectures, implementing authentication and authorization flows, integrating third-party APIs, and optimizing performance. Passionate about solving complex problems and building reliable, production-ready software systems.

KEY SKILLS

- **Languages:** C, C++, JavaScript (ES6+), TypeScript
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Component-based architecture, State management, Responsive & accessible UI
- **Backend / Full-Stack:** REST APIs basics, Authentication & Authorization (JWT, OAuth – basics), Supabase, CRUD operations, Client-server communication
- **Core Computer Science:** Data Structure & Algorithms, OOP's, Operating Systems, DBMS
- **Software Engineering:** Clean code, Modular design, Debugging, Performance optimization, Version control
- **Tools & Platforms:** Git, GitHub, Postman, Vercel

WORK HISTORY

Software Engineer Intern – TOGENO | Remote

1/2026 – 2/2026

- Designed and implemented scalable frontend architecture using modular components, reusable logic, and optimized rendering for performance.
- Implemented role-based access control and authorization-aware UI workflows integrated with backend logic.
- Validated application logic, user flows, and state transitions to ensure correctness and consistency across modules..

Frontend Developer Intern – Avinya Web | Bikaner

06/2025 to 07/2025

- Created and maintained responsive web pages with attention to layout, styling, and accessibility.
- Translated design requirements into browser-based implementations.
- Optimized UI components for performance and device compatibility.
- Manage Routing between pages.

PROJECTS

BillMate – Invoice & Client Management System

[Link](#)

- Built a production-ready SaaS application with dynamic invoice and client workflows, integrating AI-powered summaries and reminders to improve usability and reduce input errors by ~30%.
- Developed reusable components and optimized user flows across authentication, dashboard, and reporting modules.
- Designed application architecture with separation of concerns, reusable components, and scalable data flows.
- **Tech Stack:** Next.js, React.js, TypeScript, Tailwind CSS, Supabase, Gemini API

AI Project Analyzer

[Link](#)

- Built an AI-powered GitHub Project Analyzer that evaluates repositories for code quality, architecture, scalability, and security, and provides automated reviews with improvement insights.
- **Tech Stack :** Next.js, TypeScript, Tailwind CSS, GitHub OAuth, Gemini AI, REST APIs, Vercel.

EDUCATION

Bikaner Technical University, Bikaner

Bachelor of Technology in Computer Science & Engineering
2022–2026 | CGPA: 7.6 | SGPA : 8.8

Relevant Coursework:

Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming, Software Engineering

Problem Solving: DSA practice on Codolio / LeetCode / Geeks for Geeks

Leadership & Volunteering

- Vice President — **SAC, BTU**
- Hackathon 2026 — Team collaboration & problem-solving
- RAM Volunteering Program — Event coordination
